DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11-30, drawn to an apparatus for obtaining hydrogen by electrolysis, classified in class 204, subclass 278.
 - II. Claims 31-54, drawn to a method for obtaining hydrogen by electrolysis, classified in class 205, subclass 628.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed could be used to perform an entirely different electrolysis reaction, such as the electrolysis of an NaCl aqueous solution to produce Cl₂ gas.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Steven Prewitt on 21 August 2003 to request an oral election to the above restriction requirement, but resulted in an written restriction being requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
